Table 1. The index fields of method level

Field	Description
Classname	The name of the class in which the method is located
Description	The description of the method
HasJavaDoc	Whether contains Javadoc
Source	Method body
Sourcefield	The ID of the method in the source file
MethodId	The ID of the method in ES
Indexfield	Method name, annotation information
Indexinsource	The starting position of the method in the file
Type	The type of method

Table 2. The index fields of class level

Field	Description
Symbol	Type
Classname	The name of the class
Description	The description information of class
ClassId	The ID of the class in ES
Type	The type of class
Indexfield	The annotation of class, the index of all common child members
Source	The content of class
IndexInSource	The starting position of the class in the file

Table 3. The index fields of project level

Version	Project version number
ProjectId	The ID of the project in ES
IndexInSource	The starting position of the project in the file
Source	The POM fragment of project
Indexfield	The description of the item, index of all common child members
